HB2599
Proponent Testimony
Written Only

Chairman Humphries and the House Judiciary Committee:

I am submitting proponent testimony for HB2599. I am a big fan of open and transparent government. One way to see how your government is acting is to request an open records act, also known as KORA. I support the new proposed language of no charge for digital copies or the time it takes to see if a record exists. These charges can amount to a hefty price tag depending on what the records are you are looking for. This change will be a benefit for people who need to dig into what is going on in the state and local offices. I support a more attainable fee structure. Again I am a proponent of HB2599.

Respectfully,

Brett Anderson
