

TESTIMONY ON HOUSE BILL 2830

By Representative Mike Thompson

House Bill 2830 limits the documentation required to determine eligibility for benefits derived from a service-connected disability.

Section 1 defines the terms “service-connected” and “veteran”. It also states that no state agency or municipality shall request or demand any other document to determine eligibility for a benefit derived from a service-connected disability, except for the six forms of documentation listed in the bill. Those documents include a U.S. passport, a veterans health identity card, a veterans identification card, a common access card or any department of defense identity card.
