Senate Federal and State Affairs Committee
SB 3 - Proponent Testimony

Zach Liedl
Student, Challenger Intermediate School

Chairman Thompson and Members of the Committee,

The dinosaur's genus name "Silvisaurus" means "woodland lizard", and is said to be from the late Cretaceous period, more than 100 million years ago. It was a herbivore, thought to be about 13 feet in length and it weighed about 2,000 lbs. The *Silvisaurus condrayi* discovery was officially designated as a NEW species to science by Theodore Eaton of the University of Kansas in 1960.
