

2.8.2023

Senate Committee on Public Health and Welfare
Proponent SB 6, in person

Chairman Gossage and Committee Members

It is clear now looking back, that the Government mandates were a failure with great loss to the economics, children, family business, and the working class of Kansas. The shut downs, masking, distancing, testing, quarantines, and most egregious the mandatory vaccinations to work. To feed your family and keep a roof over your head, you were mandated to take a not effective and not safe drug. These vaccines were and are tested on the public. I hope someone is watching, studying, and recording all side effects and deaths of each type of vaccine and the number of vaccines taken. Treatment was available and not shared by our Government Health systems.

This bill restricts the power of the Secretary of Health and local Health Officers from ordering individuals in isolation, quarantine, lock-downs, prohibit public gatherings, unilaterally adopt new rules and regulations, order the isolation or quarantining of a minor based on vaccination or masked status, and to order law enforcement to enforce orders.

Please Pass SB 6 and Restore individual, religious and health freedom by returning public health to its original intent, which is to recommend and educate ONLY.

Thank you
Debbie Detmer
