

## Written Testimony Only

Proponent of SB5  
February 13, 2023

Madam Chair Gossage and the Senate Committee on Public Health and Welfare:

I am a proponent of Senate Bill 5 and I ask for your support as well. Please pass legislation that will protect the preborn. At any time, including during a “state of emergency”, the murder of the most innocent of human beings must not be acceptable. That would be unjust. Murder is not “health care”.

Chemical Abortion: A Review - - - [BG3603.pdf \(heritage.org\)](#)

Every child has the right to life. Kansas law affirms in Statute 65-6732 that human beings begin their lives at the moment of fertilization. We all are (obviously) in different stages of life. At no time is one life more valuable than another’s. Remember the injustice for the slaves during the “Bleeding Kansas” times. Haven’t we learned our lesson?

This bill will protect Kansans. I would appreciate your support of SB5.

Sincerely, Elizabeth Groff – Linwood KS, Senate District 9
