

To Chair Gossage members of the committee:

I urge you to not pass out of committee HB2264. I feel some hospitals have already stepped outside their boundaries. The COVID-19 was a big farce and many people died alone because of it. Terminally ill patients should be allowed as many visitors as needed and for as long as they are needed. Who cares the length of time when a person is at the end of their life. If this bill is pertaining to COVID-19 rules on PPE, then it should be null and void. The masks didn't help anybody. Anyone that knows the correct procedures for how a mask is to fit would know they don't work for that application. Finally, why should the hospitals be immune from civil liability? Other businesses are not, why are they any different? Please do not pass HB2264 out of committee.

Respectfully,

Brett Anderson

Sedgwick County Precinct Committeeman
