

Proponent SB 391 Written Only Testimony  
Public Health and Welfare  
February 12, 2024

Dear Honorable Chairwoman Senator Gossage and Members of the Public Health and Welfare Committee:

I strongly urge your support for SB 391: Constitutional Right to Health Freedom.

It should be obvious that individuals in a free society should make their own health care decisions, based on their own individual needs. The role of public health officials should be to serve the people by informing and recommending. In no case should these state officials be allowed to become health police who threaten, isolate, quarantine, and punish.

Please support SB 391.

Sincerely,  
Teresa Hopper  
Lawrence, Kansas  
Kansas Senate District #2
