To: Tom Sloan

Representative Sloan,

The State motor fuel tax rate is \$.24/gallon for gasoline and \$.26/gallon for diesel fuel. There is no tax charged for CNG.

I have read that the EPA has produced a formula in which 33.7 kilowatt hours of electricity is equivalent to one gallon of gasoline. If you were to keep things perfectly equal, the rate would be \$.007 per kilowatt hour. http://en.wikipedia.org/wiki/File:Chevy_Volt_EPA_Fuel_Economy_Official_Label.png
The Chevy Volt's sticker is at the link above in case you would like to compare.

Thanks,

Lindsey Douglas
