Wichita, KS 67212

January 9, 2012

Hi my name is Janet Moore. I am a concerned parent, and I ask you to please support HB 2094 for a Conscientious Exemption to state-mandated vaccinations.

Not all children can safely receive vaccinations.

It is imperative that parental rights are upheld and parents are given the right to make an informed choice about what is best for their child. My daughter developed symptoms following routine vaccinations that were deeply concerning to me. These symptoms, however, do not meet normal guidelines for medical exemption status, but nevertheless impacted the quality of life for my daughter for several months. These same disconcerting symptoms are indicative of other children I have found who died (such as Laura Meyer of Wichita, KS) or are experiencing serious side effects due to continued vaccinations. I cannot, in good conscience, submit my daughter to further risk of these disturbing and possible fatal complications that have unfortunately been the experience of others.

Please uphold my parental right to make the best informed choice regarding my child. No one else has the right to supersede this determination I have made in all seriousness and study. I am not anti-vaccine. I am just protecting my child.

There are nineteen states who have allowed conscientious exemptions to state mandated vaccines and there is *no relationship between the reported exemptions and reported diseases in these states.*

Please uphold the freedom of conscience for parents regarding state mandated vaccinations.

Thank you for your time and consideration.

Sincerely,

Janet Moore
