

I am a Kansas voter and concerned citizen. I support SB 410. My friends son has dyslexia and I watch him struggle all the time since they can't afford to get help. If you pass SB 410 working class people like us, and our children like him can get access to things. If you pass SB 410 these people will be able to afford the same opportunity to read and get an education to reach their full potential like everyone else.
