

Same song, second verse- No, I'm not going to sing, but it would go like this:

" Fools rush in where Angels fear to tread", seems so appropriate for this SB269.

On a more serious 'note' I would ask, "Are there any limits and haven't we gone far enough from the consequences of drinking, losing lives, accidents, increase of drugs, etc ALL FOR MORE REVENUE? Other than the ramifications of consuming more alcoholic beverages even in the smallest amount, my questions would be:

-- * How is the State Alcohol Beverage control going to police the people coming in to receive samples? No doubt, there will be a need for more employees to supervise or monitor like for minors.

* Can anyone be denied? Like the homeless? Handicapped?

* How many samples will be available? ? At all hours?

* What is keeping a person from going to one store after another to try more samples? Some that they missed before, & they want all they could get.

* Would they be obligated to make a purchase at some point?

* If we're playing games- when is there a shift for employees, that a person could come back and get more samples of a different choice at a different time and they wouldn't know that they were previously in. In that case, why should they even have to purchase any? Who is responsible for their actions when they leave? To endorse such an idea would be opening up a new can of worms that would lead to more deaths, family heartaches, accidents and the list goes on & on.

Seems a waste of time to even discuss such a matter. Please be wise & oppose this ridiculous idea !!!!!

Thank you !
