

## 2012 Kansas Statutes

**47-653h. Same; vehicle used in transporting animals to be disinfected.** Any motor vehicle used in the hauling or transporting of swine from the premises where diseased or exposed swine have been under hog cholera quarantine to a destination where such swine are to be slaughtered, including a licensed disposal plant, shall be thoroughly cleaned and disinfected after unloading such swine. Such cleaning and disinfection shall be made under the supervision of the animal health commissioner, or the authorized representative of the animal health commissioner, with a disinfectant which has been approved by the animal health commissioner.

**History:** L. 1969, ch. 263, § 5; L. 1989, ch. 156, § 45; L. 2012, ch. 140, § 68; July 1.
