

2012 Kansas Statutes

65-153f. Prenatal serological tests for syphilis and hepatitis b; approved laboratories; laboratory reports, confidentiality. Each physician or other person attending a pregnant woman in this state during gestation, with the consent of such woman, shall take or cause to be taken a sample of blood of such woman within 14 days after diagnosis of pregnancy is made. Such sample shall be submitted for serological tests which meet the standards recognized by the United States public health service for the detection of syphilis and hepatitis b to a laboratory approved by the secretary of health and environment for such serological tests. Any state, United States public health service, or United States army, navy or air force laboratory or any laboratory approved by the state health agency of the state in which the laboratory is operated shall be considered approved for the purposes of this act. Any laboratory in this state, performing the tests required by this section shall make a report to the secretary of health and environment of all positive or reactive tests on forms provided by the secretary of health and environment and also shall make a report of the test results to the submitting physician or person attending the woman. Laboratory statements, reports, files and records prepared pursuant to this section shall be confidential and shall not be divulged to or open to inspection by any person other than state or local health officers or their duly authorized representatives, except by written consent of the woman.
