

2012 Kansas Statutes

75-3517. Records and documents to be produced on acid-free paper. All records and printed documents created by state agencies shall be produced on acid-free paper having a minimum pH of 7.0, unless use of such paper is infeasible because of excessive costs or inadequate availability of the paper.

History: L. 1992, ch. 179, § 1; July 1.
