To: House Committee on Education and Senate Committee on Education

From: Kansas Legislative Research Department Staff

Re: Requested Information

Listed below are items various Committee members have requested recently. If we have missed providing a requested item, please let one of us know.

- A spreadsheet showing the percent each school district spent in the 2010-11 school year on instruction as a percent of operating expenditure (Attachment 1A). Operating expenditures are defined by the U.S. Census Bureau. Each state submits the data on an annual basis. Each function is defined by the National Center of Educational Statistics (NCES) handbook titled "Financial Accounting for Local and State School Systems." A one-page excerpt from this handbook is enclosed describing the "instruction" category and what can be included in that category (Attachment 1B). The handbook can be found at http://nces.ed.gov/pubsearch/pubsinfo.asp?pubid=2009325.
- A spreadsheet showing the free meal headcount for each school district for school years 2006-07 through 2012-13 (Attachment 2). Kansas Department of Education (KSDE) staff indicated the free meal applications have increased as a result of recession and unemployment.
- A spreadsheet containing the number of students eligible for free lunch by school district for school year 2010-11 and the number of students receiving services from state at-risk funds for the same school year. KSDE staff noted some of the school district at-risk programs are more expensive than others depending upon the severity of at-risk. Recently, state statutes were changed to permit school districts to use at-risk funds to pay the half day of kindergarten not funded under the school finance law (Attachment 3).
- A copy of the "Eligibility Manual for School Meals" describing how eligibility is determined and verified (Attachment 4).
- One-page sheets showing the calculations leading to the three school districts having excess local effort in the 2011-12 school year. These are enclosed. In general, the Wolf Creek Power Plant provides increased valuation in USD 244 and oil and gas-related entities in USDs 209 and 507 (Attachment 5).

Enclosures

U.S. Census Bureau Description of Instruction

Classifications of Expenditures

Function

The function describes the activity for which a service or material object is acquired. The functions of a school district are classified into five broad areas: instruction, support services, operation of noninstructional services, facilities acquisition and construction, and debt service. Functions are further classified into subfunctions. Each classification is presented by a code number followed by a description.

- Instruction. Instruction includes the activities dealing directly with the interaction between teachers and students. Teaching may be provided for students in a school classroom, in another location such as a home or hospital, and in other learning situations such as those involving cocurricular activities. It may also be provided through some other approved medium, such as television, radio, computer, the Internet, multimedia, telephone, and correspondence, that is delivered inside or outside the classroom or in other teacher-student settings. Included here are the activities of aides or classroom assistants of any type (graders, teaching machines, etc.) who assist in the instructional process. If proration of expenditures is not possible for department chairpersons who also teach, include department chairpersons who also teach in instruction. Expenditures for full-time department chairpersons should be reported in function 2490 Other Support Services School Administration. (Used with all programs 100–900.)
- Support Services. Support services provide administrative, technical (such as guidance and health), and logistical support to facilitate and enhance instruction. These services exist as adjuncts for fulfilling the objectives of instruction, community services, and enterprise programs, rather than as entities within themselves.
- 2100⁵ **Support Services—Students.** Activities designed to assess and improve the well-being of students and to supplement the teaching process.
- Attendance and Social Work Services. Activities designed to improve student attendance at school that attempt to prevent or solve student problems involving the home, the school, and the community. Registration activities for adult education programs are included here. Some examples of other services to be reported within this function code are supervision services, attendance services, and student accounting services. (Used with all programs 100–900.)
- Guidance Services. Activities involving counseling with students and parents; consulting with other staff members on learning problems; evaluating the abilities of students; assisting students as they make their own educational and career plans and choices; assisting students in personal and social development; providing referral assistance; and working with other staff members in planning and conducting guidance programs for students. Guidance services may include supervision services, counseling services,

⁵Account codes that are necessary for NCES reporting.

Eligibility Manual for School Meals

Determining and Verifying Eligibility

Child Nutrition Programs
Food and Nutrition Service
U.S. Department of Agriculture

PART 8: VERIFICATION

A. GENERAL DEFINITIONS

VERIFICATION is confirmation of eligibility for free and reduced price meals under the NSLP and SBP. Verification is only required when eligibility is determined through the application process, not through direct certification conducted with an Assistance Program or officials or agencies that documented Other Source Categorical Eligibility. Verification must include either confirmation of income eligibility or confirmation that the child or any member of the household is receiving assistance under SNAP, FDPIR or TANF or that a child is Other Source Categorically Eligible. Verification may include confirmation of any other information required on the application, such as household size.

DIRECT VERIFICATION is using records from public agencies to verify income and/or program participation. See Part 9 of this manual.

ERROR PRONE means applications within \$100 per month of the applicable Income Eligibility Guideline. Error prone replaces the term "Focused Sample."

RANDOM SAMPLING means each application has an equal chance of being selected. A statistically valid random sample is not required. The LEA must determine a selection interval by dividing the number of applications by the required sample size.

SAMPLE POOL means the total number of applications approved as of October 1.

SAMPLE SIZE means the number of applications subject to verification; the minimum and maximum sample size is three percent total.

B. EXCEPTIONS TO VERIFICATION REQUIREMENTS

Verification efforts are not required:

- For children who have been certified under direct certification procedures including children documented as eligible migrant, runaway, homeless children, foster children and children participating in Head Start/Even Start;
- For children in RCCIs except for applications for any non-residential students attending the institution;
 - o Applications from children listed above are not included in the sample pool

free or reduced price meals for their children. We would recommend that an LEA consult with legal counsel in establishing the parameters of verification for cause for school district employees.

FNS supports use of verification for cause where appropriate as a method for LEAs to address integrity concerns. We strongly encourage LEAs and their legal counsel to consult with their State agency prior to undertaking verification for cause where concerns with employee misrepresentation of information on an income eligibility application have been raised. State agencies should assist in ensuring that LEAs balance administrative requirements and integrity with access to free and reduced price meals for eligible children.

E. APPLICATION SELECTION PROCEDURES

AVAILABLE SAMPLE SIZES

There are three sample sizes established for verification activities. The standard sample size must be used by LEAs unless it qualifies to use one of the alternate sample sizes.

STANDARD SAMPLE SIZE

The standard sample size is the lesser of

- Three percent (3%) of all applications approved by the LEA for the school year, as of October 1 of the school year, selected from error prone applications;
- 3,000 error prone applications approved by the LEA for the school year, as of October 1 of the school year.

ALTERNATE SAMPLE SIZES

LEAs that qualify may select one of the following sample sizes.

Alternate one:

The sample size equals the lesser of

- 3,000 of all applications selected at random from applications approved by the LEA as of October 1 of the school year;
- Three percent (3%) of all applications selected at random from applications approved by the LEA as of October 1 of the school year.

Alternate two:

The sample size equals the lesser of the sum of

- The LEA had 21,000 children approved for free or reduced price meal benefits based on a total of 6,000 approved applications
 - o Therefore, 180 household applications (3% of 6,000) must be verified
- Of those 180 households, 45 households failed to respond to verification requests, which results in a non-response rate of 25% (45 ÷ 180 as a percentage)
- The LEA must improve the 25% non-response rate by at least 10%
 - o The improvement rate is calculated by multiplying the non-response rate by 10% which is 25% x 10%= 2.5%

Year 2: School Year 2012-2013

- The LEA had 6,000 approved applications, so the sample size is 180 (3% of 6,000)
- The number of non-respondents was reduced to 40 which is a non-response rate of 22.2% (40 ÷ 180 as a percentage)
- The next step is to calculate the level of improvement needed between Year 1 and Year 2
 - Subtract Year 1's non-response rate from Year 2's non-response rate (25% minus 2.5%= 22.5%)
- Since 22.2% is less than the minimum non-response rate of 22.5%, there is more than a 10% improvement
- The LEA is qualified to use an alternate sample size for School Year 2012-2013

Year 3: School Year 2013-2014

The LEA may choose to use one of the alternate sample sizes for its verification activities

CONTINUING ELIGIBILITY FOR USE OF AN ALTERNATE SAMPLE SIZE

The LEA must annually determine if it is eligible to use one of the alternate sample sizes. If the LEA determines it is eligible, it must contact its State agency in accordance with any procedures established by the State agency for approval prior to use of alternate sample sizes.

STATE AGENCY RESPONSIBILITIES

Each State agency must establish a procedure for LEAs to designate use of an alternate sample size. The State agency may also establish criteria for reviewing and approving the use of an alternate sample size, including deadlines for submissions.

G. POST SELECTION PROCEDURES

There are two procedures that the LEA completes prior to contacting the household to obtain documentation of eligibility. These are the required confirmation reviews and the optional replacement of certain applications.

REPLACING APPLICATIONS

After completing the confirmation reviews, the LEA may, on a case-by-case basis, replace up to five percent of applications selected. Applications may be replaced when the LEA believes that the household would be unable to satisfactorily respond to the verification request.

Any application removed must be replaced with another approved application selected on the same basis (i.e., an error-prone application must be substituted for a withdrawn errorprone application). The newly selected application must then have confirmation review.

In those LEAs where five percent of total applications result is less than one, one application may still be replaced. All results of the five percent calculation are rounded up to the next whole number.

H. HOUSEHOLD NOTIFICATION OF SELECTION

Once the LEA has completed the post selection procedures, it proceeds with household notification.

CONTACTING THE HOUSEHOLD

When a household is selected for verification and is required by the LEA to submit documents or other forms of evidence to document eligibility, the household must be sent a letter informing them of their selection and of the types of information acceptable to the LEA. Prototype notification materials may be found using the link in Appendix B of this manual.

The letter must include the following:

- That the household was selected for verification;
- Use of Information Statement (Please note that the Social Security Number (SSN) for all household members is no longer required for verification.);
- The types of acceptable information that may be provided to confirm current income, including pay stubs, award letters from assistance agencies for benefits such as social security or supplemental security income, and support payment decrees from courts;
- That the household may provide proof that a child or any household member is
 receiving benefits under the Assistance Programs instead of providing income
 information or that a child is Other Source Categorically Eligible; that documentation
 of income or receipt of assistance may be provided for any point in time between the
 month prior to application and the time the household is required to provide income
 documentation;
- That information must be provided by a date as specified by the LEA and that failure to do so will result in termination of benefits;
- · Name of an LEA official who can answer questions and provide assistance; and
- A no-cost to the household telephone number.

For verification inquiries, the LEA must provide a telephone number that is available at no cost to the household. The LEA may establish a toll-free number or allow the household to reverse the charges if any households in that LEA are outside the local calling area. The LEA may also provide different telephone numbers for each local calling area within the LEA.

COLLATERAL CONTACTS

A collateral contact is a person outside of the household who is knowledgeable about the household's circumstances and can give confirmation of a household's income participation in Assistance Programs or Other Source Categorical Eligibility Program sources. Collateral contacts include employers, social service agencies, migrant workers' agencies, and religious or civic organizations. The verifying official should request a collateral contact only in cases when the household has not been able to provide adequate written evidence.

The verifying official must give the household the opportunity to designate the collateral contact. However, the verifying official may select a collateral contact if the household fails to designate one or designates one who is unacceptable to the verifying official. In either case, no contact may be made without first notifying the household and obtaining its permission.

All collateral contacts may be written or oral and must be documented, dated, and initialed. The LEA will examine any written information provided by the collateral contact or evaluate any oral information. If the collateral contact is unwilling or unable to provide the requested information, the LEA must contact the household to complete the verification process.

Verification of eligibility for households that provided an Assistance Program case number on the application may be accomplished by submitting a list of names and Assistance Programs case numbers to the local SNAP or welfare office for confirmation of certification of receipt of benefits from agency records. (See *Part 9: Direct Verification*.)

AGENCY RECORDS

A household's eligibility may be confirmed through the use of information maintained by other government agencies to which the State agency, LEA, or school has legal access. Although USDA regulations do not require that households be notified of selection when verification is made through agency records, such agencies may have their own notification requirements.

One source of agency records is the wage and benefit information maintained by the State employment agency if that information is available to the verifying official. Such records are State records, and the release of information maintained by State employment offices is governed by State law. (See *Part 9: Direct Verification*.)

Acceptable documentation of income or receipt of assistance from any of the above sources may be provided for any point in time between the month prior to application and the time the household is required to provide income documentation.

WHEN A HOUSEHOLD INDICATES NO INCOME

If a household is selected for regular verification or verification for cause and the application indicates zero income, the LEA must request an explanation of how living expenses are met and may request additional written documentation or collateral contacts.

- The follow-up contact must attempt to obtain the missing written evidence or obtain collateral contact information.
- If the collateral contact is unwilling or unable to provide the requested information, the LEA must contact the household to complete the verification process.

The LEA must make a follow-up attempt when the household:

- Does not respond to the request for verification;
- Submits insufficient or obsolete written evidence;
- · Does not designate collateral contacts; and
- Collateral contacts are unable or unwilling to provide the requested evidence.

If, after at least one follow-up attempt:

- Household responds and provides all needed evidence, verification is considered complete for this household:
 - o If there is no change in benefits;
 - When household is notified that its benefits will be increased:
 - o When notice of adverse action is sent.
- Household does not respond, verification is considered complete for this household:
 - o When notice of adverse action is sent.
- LEA is unable to continue its verification activities because the household fails to
 provide adequate written evidence or knowledgeable collateral contacts, verification
 is considered complete for this household:
 - When the notice of adverse action is sent.

K. NOTICE OF ADVERSE ACTION

All households for whom benefits are to be reduced or terminated must be given 10 calendar days' written advance notice of the change. A prototype notice of adverse action may be found using the link in Appendix B. of this manual.

The notice of adverse action may be sent via the postal service or to the email address of a parent/guardian. The LEA cannot notify the household of adverse action by phone.

The first day of the advance notice period is the day the notice is sent. The notice must advise the household of the following:

- Change in benefits:
- · Reasons for the change;
- That an appeal must be filed within the 10 calendar days advance notice period to ensure continued benefits while awaiting a hearing and decision;
- Instructions on how to appeal;
- That the household may reapply for benefits at any time during the school year; and
- Households that were terminated because no member was receiving benefits from an Assistance Program may submit an application containing household names and income information and provide written evidence of current household income.

L. BENEFITS DURING AN APPEAL

- Copies of all relevant correspondence between the households selected for verification and the LEA;
- One of the following for all documentation used to verify eligibility:
 - All documents submitted by the household or reproductions of those documents; or
 - o In cases where the actual documents or photocopies cannot be kept, the verifying official must make a written record of the documents submitted by the household including the type of document, e.g., wage stubs or a letter from an employer, income shown on the document, time period of the income, and the date of the document and any changes in eligibility as a result of verification procedures, the reasons for the changes, and the date the change was made.
- Any change in eligibility as a result of verification procedures, the reason for the change and the date the household was notified, if necessary, and the date it became effective; and
- · Records of follow-up attempts and results.

LEAs should also record:

- Any additional information necessary to show the efforts made by the LEA to meet the verification requirements;
- · Title and signature of the verifying official; and
- Criteria for replacing applications for verification.

When verification information is needed for coordinated review effort (CRE) purposes, the LEA must be able to provide this information for each school selected for review.

P. QUESTIONS AND ANSWERS

1. What if an application is selected for verification but, the household transfers out of the school district before the information can be verified?

If a household selected for verification transfers out of the district before the information can be verified, verification cannot be completed. To meet the minimum verification requirements, a new application must be selected.

2. What if I am using other agency records and that agency does not respond before November 15?

The LEA should document that it contacted another agency well in advance of deadline which demonstrates good faith. This would be a valid reason for the State agency to extend the deadline.

3. How is overtime income counted for the purposes of verification?

The LEA official should work with the household to determine whether the overtime for the month being verified is representative of overtime received in other months. If the overtime is a one-time or sporadic source of income, income should be calculated based on the regular monthly income without overtime.
