

KCP&L SmartGrid Demonstration

Kansas House Energy & Environment Committee

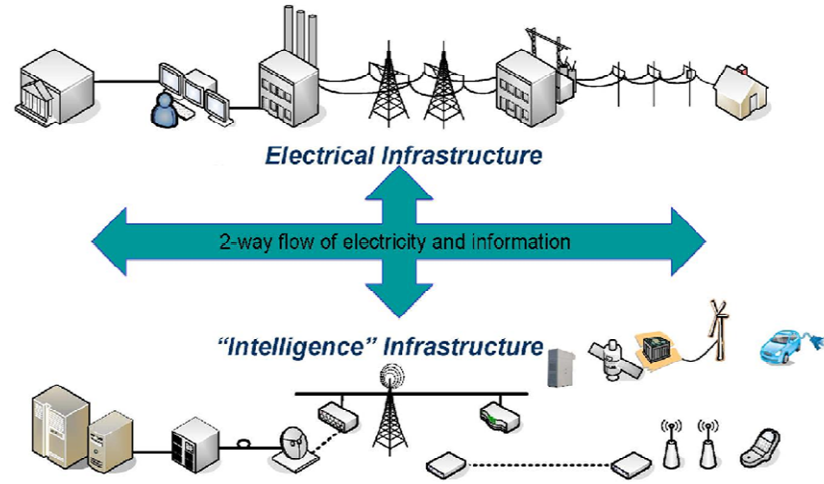

Bill Menge
Director, SmartGrid

February 7, 2013
Topeka, KS

What is SmartGrid?

SmartGrid is basically the integration of digital equipment & communications into the electric utility infrastructure. It enables a 2-way flow of information & energy.

National Institute of Standards Smart Grid Depiction

*Like many industry transformations, it is a **journey**, not a destination.*

KCP&L Demonstration Objectives

- First, **it demonstrates a complete, end-to-end smart grid** — from smart generation to smart end-use — that will deliver improved performance focused on a major substation in an urban location.
- Second, **it introduces new technologies, applications, protocols**, communications and business models that will be evaluated, demonstrated and refined to achieve improved operations, increase energy efficiency, reduce energy delivery costs and improve environmental performance.
- Third, it incorporates a **best-in-class approach to technology integration**, application development and partnership collaboration, allowing KCP&L to advance the progression of complete smart grid solutions — with **interoperability standards** — rather than singular, packaged applications.
- Finally, KCP&L's demonstration project provides critical energy infrastructure required to **support a targeted urban revitalization effort** in Kansas City's Green Impact Zone and support a more **sustainable future**.

Scope of the Demonstration - we went "ALL IN"

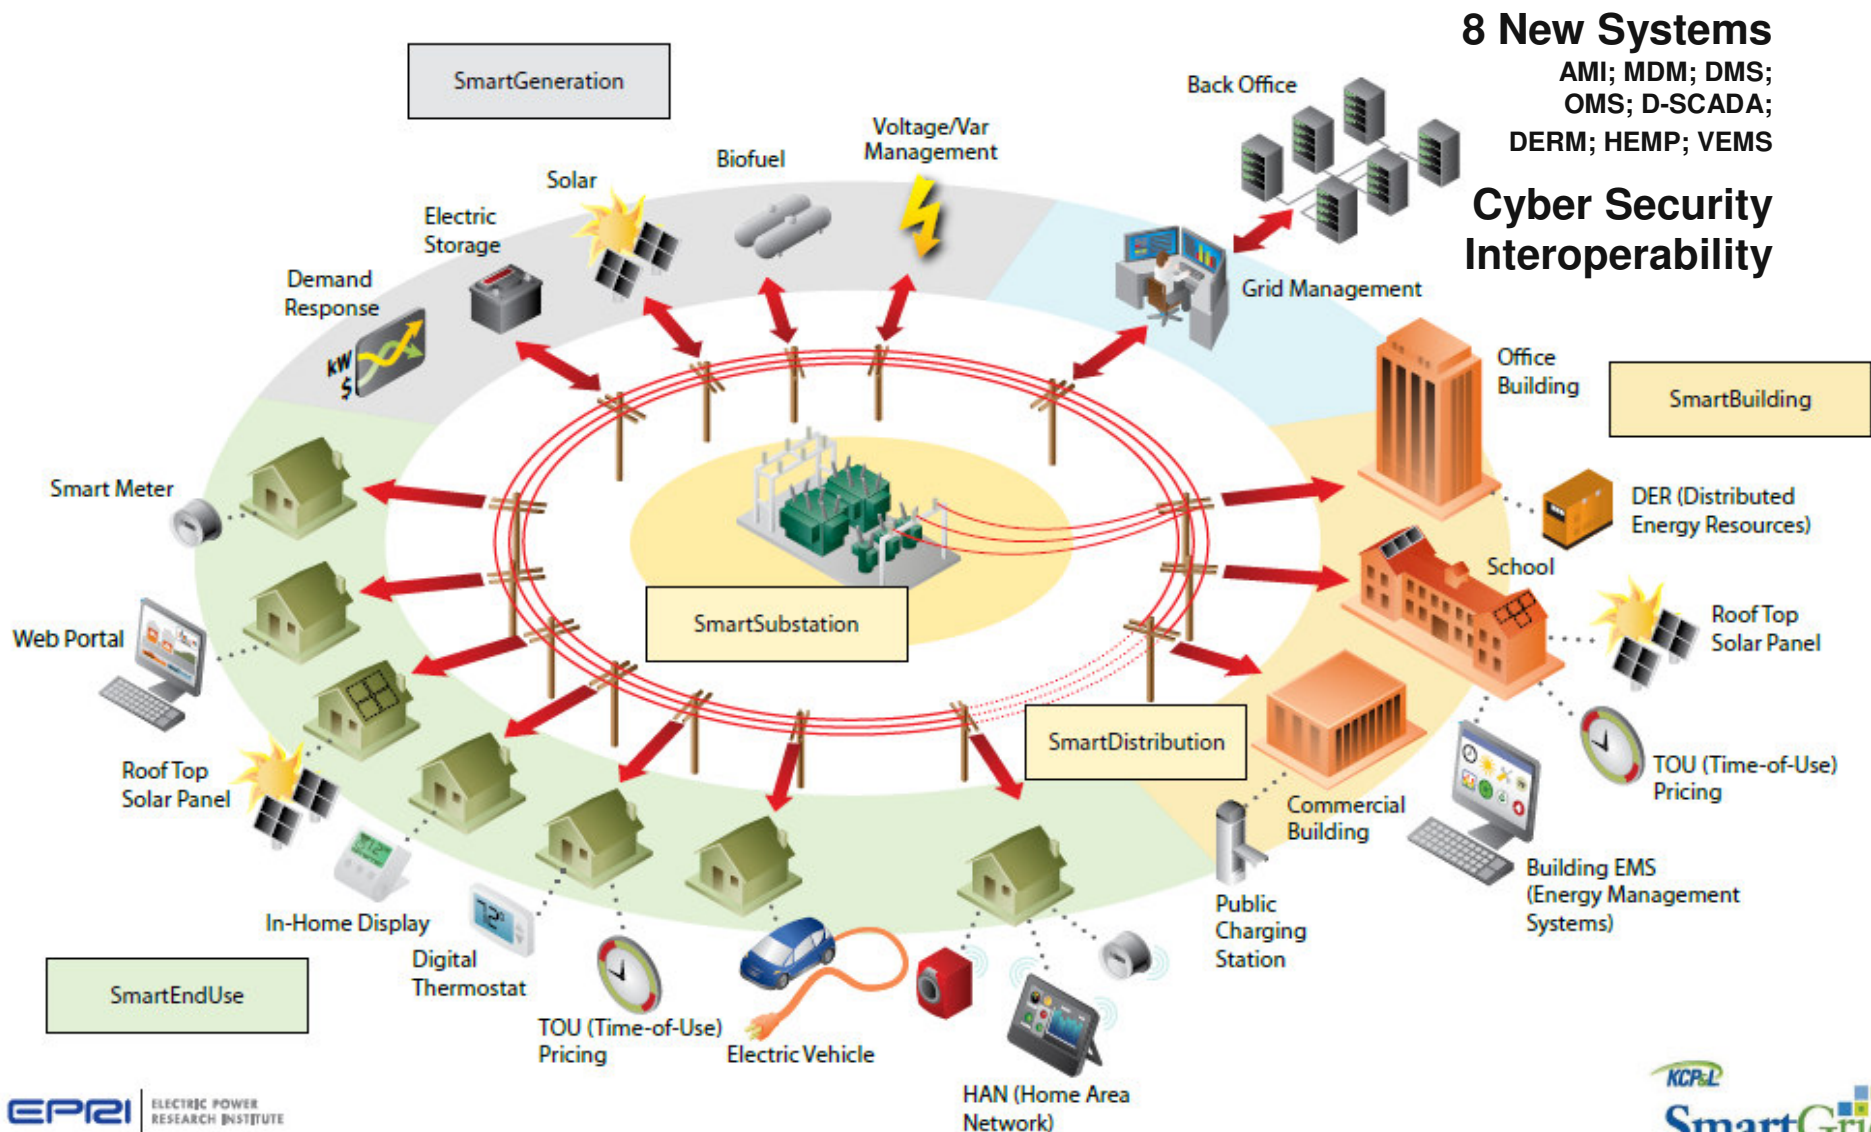

Total Project Value ~ \$58 MM (DOE SGD = \$24 MM; Partner = \$7 MM) \$44 MM spent thru 2012

| Smart Distribution | Smart Metering | Interoperability And Security | Smart End-Use | Smart Generation |
|---|--|---|--|--|
| <ul style="list-style-type: none"> Distribution Management System (DMS) with D-SCADA and OMS IP/RF 2-way DA Network Advanced DA Smart Substation  | <ul style="list-style-type: none"> Integrated CIS / MDM / AMI / OMS Architecture Smart Meters Advanced Metering Infrastructure (AMI) Meter Data Management (MDM) Data Analytics  | <ul style="list-style-type: none"> Enterprise Service Bus (ESB) IEC 61968, IEC 61850 (GOOSE and MMS), Open ADR, Zigbee SEP State of the Art Physical & Network Security (NISTIR-7628)  | <ul style="list-style-type: none"> Home Energy Management Portal (HEMP) Home Area Network (HAN) In-home Display (IHD) with Interval Data Commercial Building Energy Management System (BMS) Time-of-Use (TOU) Rates Electric Vehicle (EV) Charging  | <ul style="list-style-type: none"> Distributed Energy Resource Management System (DERM) Demand Response (DR) Programs Residential / Commercial Rooftop Solar Utility-scale Battery Storage  |

Program Advisory and Management Services Partners

Truly Comprehensive Smart Grid Initiative

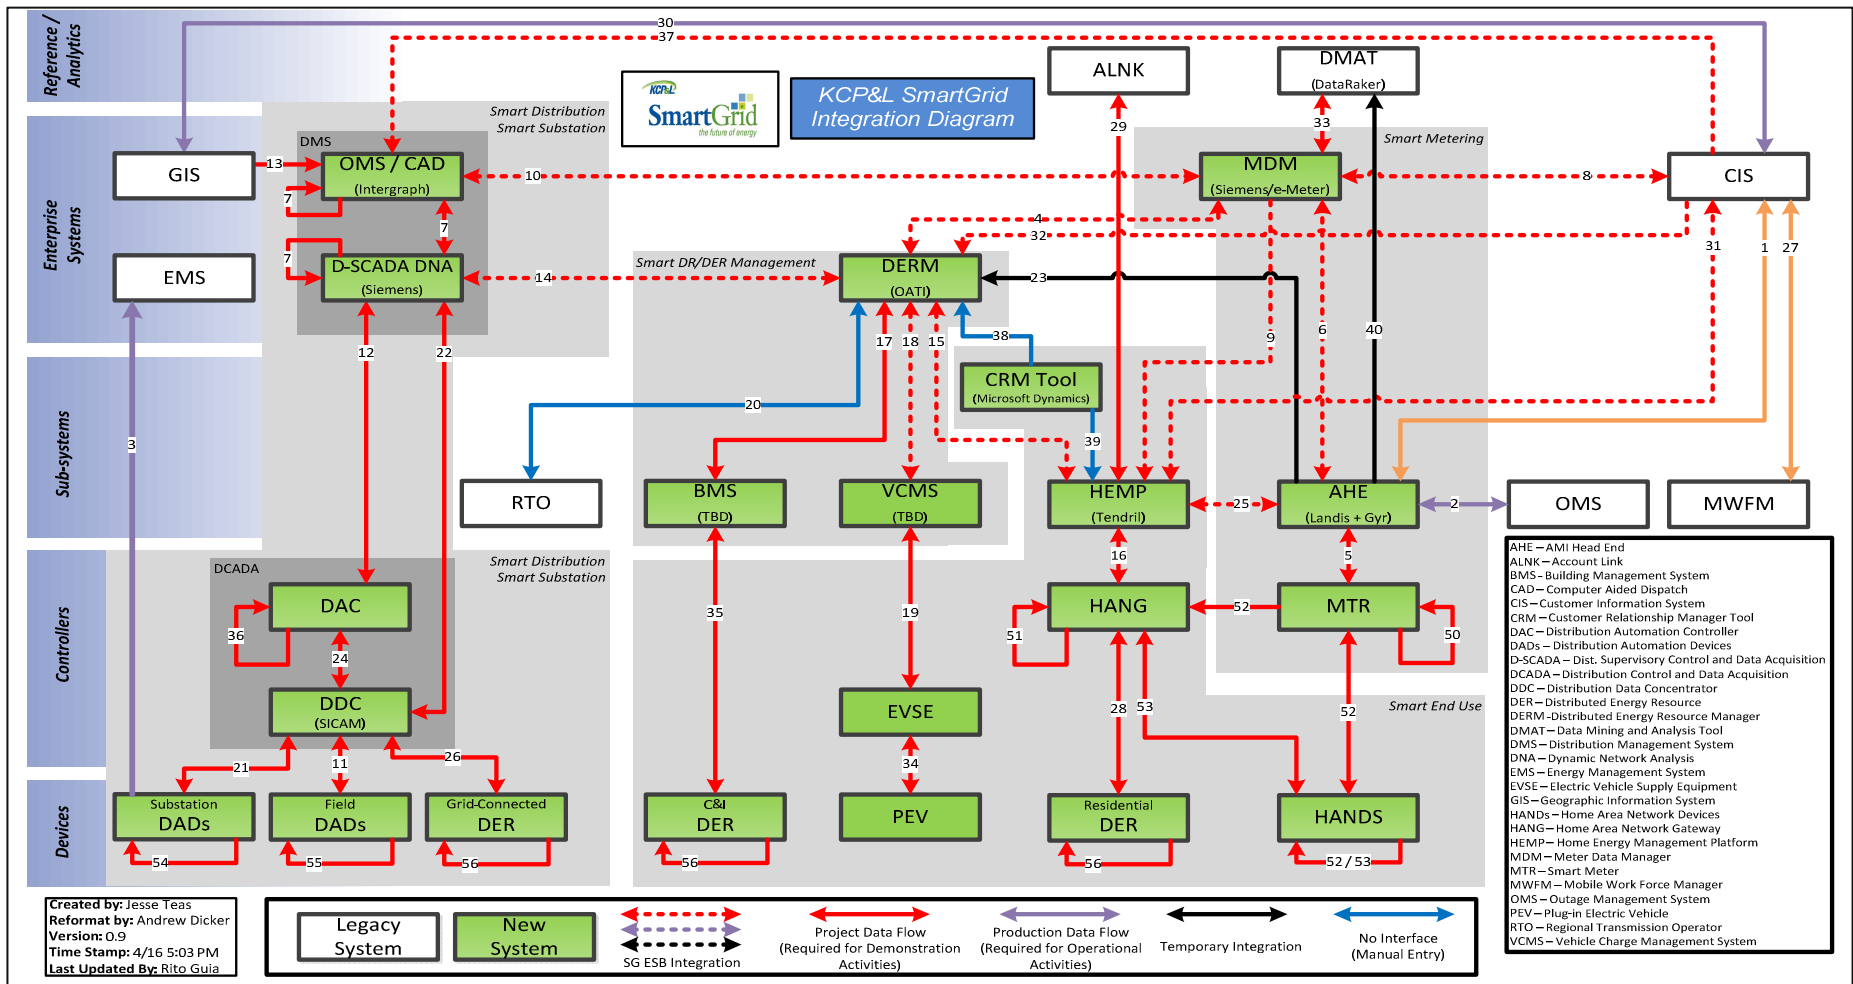

Project Area—Midtown Kansas City, MO

KCP&L's SmartGrid project in midtown Kansas City, Missouri includes the 150-block Green Impact Zone and surrounding neighborhoods, shown here in blue.

The Green Impact Zone is a cooperative effort to focus federal stimulus funding on projects in a targeted area of Kansas City, Missouri.

Interoperability is the foundation of KCP&L's SmartGrid Program – Far beyond traditional point-to-point interfaces.

Education & Outreach – Part of the “Software”

In addition to traditional communications efforts, KCP&L is focusing on new **approaches to increase awareness and engage customers:**

- Neighborhood Assoc & Faith-based Outreach
- Community Outreach Events
- Educational Programs & Materials
- SmartGrid Support Team
- SmartGrid Website (kcplsmartgrid.com)
- Stakeholder Updates (MO & KS)
- Internal Education & Change Management

Special Offer!
You have the potential to save money on your electric bill!

As a customer in the SmartGrid Demonstration Area, you may be eligible to receive FREE products to help you manage your monthly electric bill - potentially saving you money. Go to <http://www.kcplsmartgrid.com/eligible> OR complete, detach and mail the postage-paid card below, and KCP&L will contact you to determine if you qualify for the following FREE MySmart products.

- MySmart Thermostat**
Automatically sets temperatures based on the season and your personal habits and preferences.
- MySmart Home**
Monitors and controls the electricity appliances and electronics use from any computer with Internet access.
- MySmart Display**
Takes information directly from your electric meter and displays it for you in real-time.
- MySmart Portal**
Allows you to monitor and manage your electricity usage and estimate your monthly bill.
- Time of Use Rates**
Allows you to better control costs by managing when you use electricity in the summer.

Get Smarter
with FREE SmartGrid products and programs from KCP&L

You're still eligible for these great FREE SmartGrid products and programs!

- MySmart Portal:** A Web-based tool that allows you to monitor and manage your electricity usage and estimate your monthly bill.
- MySmart Display:** A portable device that takes information directly from your electric meter and displays it for you in real-time.
- Time of Use Rates:** A voluntary rate program during the summer months that allows you to better control your electricity costs by managing when you use electricity.

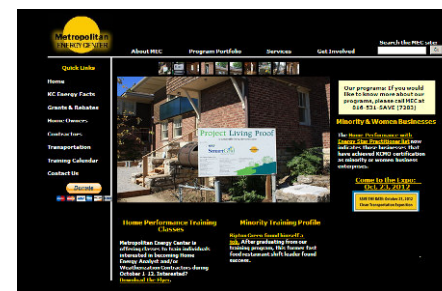

Contact the SmartGrid support team at 800-535-7887 or email SmartGridInfo@kcpl.com to learn more about SmartGrid products and programs.

Education & Outreach – making it “real” Demonstration House and SmartGrid Innovation Park

Demonstration house (Metropolitan Energy Center’s Project Living Proof)
Touch, feel, learn about and experience new, energy efficient and SmartGrid products

SmartGrid Innovation Park

Grid Battery, Solar Generation, EV Charging, Operating System displays, Educational Kiosk

KCP&L SmartGrid Innovation Park!
You are invited to explore the park and learn more about how KCP&L SmartGrid is enhancing the electric grid in our community with new technologies to help customers. Get Smarter about energy consumption and delivery.

What is a Smart Grid?
The electric grid is the connection of power plants, substations and power lines that bring electricity to your home. The grid was originally designed to be one-way system delivering energy from the power plant to customers. However, today as customer and utility needs have evolved, advanced technology is being introduced on the grid to make it a "smarter".

A smart grid is a set of advanced technologies—a type of computer and communications network—integrated with the electric grid. The smart energy companies to have been very successful with customers, equipment and meters on the grid. It is the ability to use two-way communication and modern computer technologies to the very traditional electric delivery grid. It is also "smarter" because it helps customers gain useful knowledge about how electricity is used, which can lead to numerous benefits, including saving energy and money, while reducing environmental impacts. KCP&L SmartGrid helps the company gather information from the two-way communication and use it to meet your needs better and more efficiently.

Major Accomplishments and Milestones

2010

- Project Planning
- Stakeholder Meetings
- DOE Contract AMI Infrastructure
- SmartMeter Launch (Oct 18)
- Demonstration House
- Web Portal Launch
- IHD Launch

2011

- Bill Prediction
- Begin Substation Upgrades
- 1st Solar Installation
- Security Assessment
- System, Interface & Back Office Design
- Integration Planning
- Meter Data Mgmt Ph1
- System Upgrades

2012

- Grid Battery Storage
- Smart Substation
- Meter Data Mgmt Ph2
- Home Area Networks
- Smart Thermostats
- Solar Installations
- Time of Use Rate
- EV Charging
- Innovation Park
- System Upgrades

2013+

- Dist Mgmt System
- DERM
- Building Energy Mgmt
- Complete End Use Installations
- Full Integration & Cyber Security Acceptance Testing
- Final System Interoperability Testing
- Fully Operational SmartGrid
- Measurement & Benefits

Additional Resources & DOE Credits

Appendix: SmartGrid Alphabet Soup

- **ADA** = Advanced Distribution Automation
- **ADR** = Automated Demand Response protocol
- **AMI** = Advanced Metering Infrastructure
- **BMS** = Building (Energy) Management System
- **CIS** = Customer Information System
- **DA** = Distribution Automation
- **DERM** = Distributed Energy Resource Management system
- **DMS** = Distribution Management System
- **DR** = Demand Response
- **ESB** = Enterprise Service Bus
- **EV** = Electric Vehicle
- **HAN** = Home Area Network
- **HEMP** = Home Energy Management Portal (a web portal)
- **IHD** = In-Home Display
- **IP** = Internet Protocol
- **MDM** = Meter Data Management system
- **OMS** = Operations Management System
- **RF** = Radio Frequency (“wireless”)
- **SCADA** = System Control And Data Acquisition
- **SEP** = Smart Energy Profile (a communication standard)
- **TOU** = Time of Use rate
- **Zigbee** = a low power wireless communication protocol (like WiFi)
