

Denning Recommendations for K-12 Committee

1. Eliminate the current Sept 20th student count and move to a process of determining student average daily attendance for the school year.
2. Calculate state funding on the prior year district's average attendance numbers and valuations so both state and district can budget more efficiently. (This would eliminate the surprise extra cost that occurs once we go home in April).
3. Treat the 8 mill capital outlay same as the 20 mill as far as TIF projects are concerned. (Leave with schools rather than transferring to TIF project.)
