

Pass HCR-5005

Like most Americans, I feel that the federal government is out of control, even with a new president. Out of control spending, overreaching courts and political power elites have been stealing our personal liberty for years.

The only solution is for the states to collectively use the gift the Founders gave us in Article 5, Section 2 of the U.S. Constitution to limit the feds. The Founders Framers knew that the federal government might one day become drunk with power, and they gave the States — “We the People” — a back door around the feds. You, State Legislators, have a duty to defend the Constitution and State Sovereignty; it is time to use the tools within it to save this Republic.

The HCR-5005 is a solution to propose targeted amendments to the US Constitution to limit fiscal irresponsibility, limit the power and scope of the feds, and add term limits to federal officials.

Currently eight states have passed the call for a Meeting of the States, which takes 34 states to call a convention and 38 states to pass each proposed amendments just as if Congress proposed them — which we know they will never do.

I urge your support and passage of HCR-5005 today. Thank you

Regards,

Tony Gillette
