

Ethics, Elections and Local Government Committee
March 1, 2018
SB313-Redevelop authorities; Johnson and Labette counties.

Attached is a visual of the entire redevelopment district map (former Kansas Army Ammunition Plant). The map is broke out by landowners showing the amount of acres each own. The map also shows the three remaining remediation sites. All three remaining sites are groundwater plumes. The Army has funded the remediation and the work is being done now.

700 Area: consists of 38 acres. This is a PCE & TCP plume. Expected remedial activities should begin this summer and is expected to last 2-3 years.

800 Area: consists of less than 5 acres. This is a PCE & TCP plume. Expected remedial activities should begin this summer and is expected to last 1-2 years.

1200 Area: consist of 49 acres. This area finished the remediation action in January. The final report is being reviewed by EPA and KDHE.
