

My name Is Guadalupe Magdaleno
Executive Director Of Sunflower Community Action.

Thank you for the opportunity to address committee Members.

Im sending my writing testimony in favor of HB2003 for your consideration, the reason I cant be there in person is because I'm undergoing surgery today, as you get to decide if all drivers should have a driver license and consequently car insurance.

September 19th 2017 was a life changing day for me, as me and my grand son return home from the grocery store we stop due to a baby dog running in the road, I turn on my emergency lights, two other cars stop on the opposite direction too.

As my grand son exit the car to try and catch the baby dog before he got run, I look on my rear view mirror and for split second I knew I was going to get hit.

I got rear ended and send 60 yards forward, across the street and into the ditch, my grand son was a couple of feet from the back of my car, as you can imagine he was in shock thankfully with only glass splashed on his body, I on the other hand was taken to Wesley hospital and need to undergo several surgeries. The bill from Wesley along was over 30,000 my first surgery well over that amount as well.

Luckily for me the driver was insure, but what would it be of my finances if he wasn't?

I would be in bankruptcy! And the Tax dollars of the Kansans would be left to pick up the tab.

To conclude, Can you ask your self, if you were in my shoes will you care if the person that hit you immigration status? I certainly wont, all I worry about is their identity and car insurance.
