I am writing as a proponent of SB478. This bill is very important to me to help bring back our night sky. I realize it won't do anything for noise and closeness to our farms and home. I am a farmer and the night sky in Kansas is beautiful, well it used to be. Now it is full of red blinking lights. As I drive home after being gone it is a sickening feeling when I start seeing all the red flashing lights, like 108 of them!

Please fast track this bill to the senate so my grandkids will be able to see and appreciate the beautiful skies in Kansas that I grew up with.
